

New Jersey's Do Not Call Campaign has greatly improved the quality of my familys life! The incessant and inconvenient calls from telemarketers have disrupted babies sleeping schedules- and we need to keep our ringers on since we have elderly relatives who live nearby who call us with emergencies. When we turn the phone ringers down because of the amount of telemarketers calling, we are missing important calls from our relatives! Also, the number of telemarketing calls our relatives (a 90 year old, 82 year old, 88 year old and an 87 year old) receive is unbelievable- the calls are extremely confusing and manipulative for them- asking for credit card numbers, telling them they have won trips to Florida, using names that trick my relatives....) Telemarketing companies have completely taken advantage of the telephone!

My husband and I feel that the telemarketers have invaded our privacy- NJ's Do Not Call List was one of the BEST THINGS THAT CAN BE DONE and I FELL VERY STRONGLY THAT IT SHOULD NOT BE ELIMINATED!!!!

Telemarketing companies should research better ways to solicit customers / clients - maybe spend more in advertising or event campaigns rather than bothering people when we DO NOT WANT TO BE BOTHERED!!! Chances are I will not agree to whatever they are calling about because they are a telemarketer and I will not support it!

Thank you for your consideration.
